

04th June, 2022

**Dear Parents,
Greetings!!**

It is important for us as elders to make our children understand the importance of Environment preservation so that they appreciate Nature and use natural resources carefully.

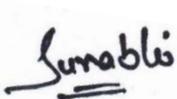

Tomorrow is 5th June, World Environment Day.

Kindly make your ward do any simple activity related to Environment conservation, click pictures and share them with the respective class teachers.

(some activities for reference : nature walk, discussion about surroundings, tree plantation, making a bird feeder, feeding birds, making a compost bin, using recycled stuff, pebble painting, understanding the use of coloured bins, wearing green, making/ using a paper bag, preparing a brochure of useful plants, etc.)

Let's keep the environment Green.

Warm Regards,

**Surabhi Mohan
Principal**
